Testking has the first and only 100% product satisfaction and exam passing guarantee. Advanced practice questions and answers help drive the information into your routine thinking and surpass 000-027 brain dumps in retention and skill building.

[IBM](#) 000-027 exam answers and practice questions can be used at home or office, installable on up to two PCs, or print the questions and answers to take with you and train on-the-go! IBM 000-027 preparation tools are the perfect fit for any IBM certification candidate with [000-027](#) training materials for every level of entry.

Exam Engine Features

Control your IT training process by customizing your practice certification questions and answers. The fastest and best way to train.

- * Truly interactive practice tests
- * Create and take notes on any question
- * Retake tests until you're satisfied
- * YOU select the areas of the exam to cover
- * Filter questions for a new practice test experience each time
- * Re-visit difficult questions

Exam: 000-027 Certification Questions & Answers

Question 1:

A maintenance engineer needs to report the actual hours worked. Assuming the engineer has the appropriate authorizations, which two applications are available to report actual labor hours? (Choose two.)

- A. Person Reporting
- B. Work Order Management
- C. Labor Reporting
- D. Work Order Tracking
- E. Assignment Scheduler

Answer: C,D

Question 2:

Key Performance Indicators (KPI) provide a means to track critical performance variables over time. KPI trends can be useful for managers to observe operational performance. These trends depend on accurate historical data. What can be used to correct a historical trend value entry?

- A. The edit and update functions in the KPI portal on the Start Center
- B. The Attributes tab of the Database Configuration application
- C. The Historical Values tab of the Trends tab within the KPI Manager
- D. An SQL statement directly against the database

Answer: D

Question 3:

How can an administrator or user register holiday or sickness in a person's calendar?

- A. Change the person availability, using the Calendars application
- B. Change the work hours in a shift, using the Calendars application
- C. Change the person availability, using the People application
- D. Change the non-working time in the calendar, using the Calendars application

Answer: C

Question 4:

What are three objects that an item can be issued to? (Choose three.)

- A. Organization
- B. Class
- C. Work Order
- D. Service Group
- E. GL Account
- F. Asset

Answer: C,E,F

Question 5:

What is the optimal method to drive the frequency of a physical count?

- A. ROP
- B. ABC
- C. MAX
- D. EOQ

Answer: B

Question 6:

The Locations application allows for the defining and managing of locations. Which two tabs are available in locations to manage associated features? (Choose two.)

- A. Labor
- B. Assets
- C. Work Orders
- D. Meters
- E. Inventory

Answer: B,D

Question 7:

A work order has been created from a service request, and all work is now finished. After all actuals are entered, the work order status is changed to Completed. How does the work order status change affect the original service request?

- A. The complete work log will be transferred to the service request.
- B. The actuals will be transferred to the service request and deleted from the work order.
- C. The service request is not affected by the work order status change.
- D. The service request status will automatically be changed to Resolved.

Answer: D

Question 8:

Which three statements are true about SYNONYM domain functionality? (Choose three.)

- A. SYNONYM domain values can be added to meet a site's unique business processes.
- B. SYNONYM domains contain internal values associated to IMAM business rules.
- C. New SYNONYM domain values must be associated with an existing internal value.
- D. SYNONYM domains can be added to meet an organization's unique business processes.
- E. New SYNONYM domain values are used to replace IBM Maximo Asset Management V6.2 (IMAM) internal values associated to IMAM business rules.
- F. New SYNONYM domain internal values must be associated with one or more values for which a synonym is wanted.

Answer: A,B,C

Question 9:

What allows an individual to assign and track the same items with different costs based on its physical condition?

- A. Sets
- B. Escalations
- C. Condition Codes
- D. Classifications

Answer: C

Question 10:

A project has been initiated by a maintenance manager for the installation of a new production line. The project has been built from several smaller projects to install components of the production line, and will be managed and monitored in IBM Maximo Asset Management V6.2 (IMAM). The maintenance manager would like to be able to have an overview of the estimated and actual costs for the entire project. The maintenance manager asks the IMAM administrator to create the project in IMAM and make the necessary configurations to view costs. How can the IMAM administrator configure the required project and functionality?

- A. The administrator must create new work orders for all projects and relate these work orders on the Related Records tab of the Work Order Tracking application. The standard View Costs action in the Work Order Tracking application provides the required functionality to track estimated and actual costs for parent and children work order.
- B. The administrator must create new work orders for all projects and relate these work orders on the Related Records tab of the Work Order Tracking application. To enable the required functionality to track estimated and actual costs for parent and children work order, the administrator needs to configure new fields and relationships in the Database Configuration application between parent and child work orders.
- C. The administrator must create a new project work order and work orders for all smaller projects. The project work order has to be selected as parent on all child work orders. The standard View Costs action in the Work Order Tracking application provides the required functionality to track estimated and actual costs for parent and children work order.
- D. The administrator must create a new project work order and child work orders for all smaller projects. To enable the required functionality to track estimated and actual costs for parent and children work order, the administrator needs to configure new fields and relationships in the Database Configuration application between parent and child work orders.

Answer: C

Question 11:

Can an item balance ever be allowed to be negative?

- A. Depends on if it is allowed in the Inventory Default settings
- B. Always
