

**000-440**

**IBM Content Manager Ondemand Multiplatform**

**Exam number/code:** 000-440

**Exam name:** IBM Content Manager Ondemand Multiplatform

**Questions & Answers:** 102 Q&A

**Related Certifications:** [IBM](#)

**Hundreds of people each day pass their IT certification exams with Testking guaranteed certification resources and training kits.**

Use the [IBM 000-440](#) questions and answers to practice for your next IBM certification exam. If you don't pass – you don't pay! Testking has the first and only 100% product satisfaction and exam passing guarantee. Advanced practice questions and answers help drive the information into your routine thinking and surpass 000-440 brain dumps in retention and skill building.

[IBM](#) 000-440 exam answers and practice questions can be used at home or office, installable on up to two PCs, or print the questions and answers to take with you and train on-the-go! IBM 000-440 preparation tools are the perfect fit for any IBM certification candidate with [000-440](#) training materials for every level of entry.

### **Exam Engine Features**

Control your IT training process by customizing your practice certification questions and answers. The fastest and best way to train.

- \* Truly interactive practice tests
- \* Create and take notes on any question
- \* Retake tests until you're satisfied
- \* YOU select the areas of the exam to cover
- \* Filter questions for a new practice test experience each time
- \* Re-visit difficult questions

**Exam: 000-440 Certification Questions & Answers**

**Question 1:**

You are hired by TestKing.com as a consultant. TestKing.com is deciding on a security solution for their new WLAN, and a PPTP VPN is their primary consideration since it is included with both server and desktop operating systems. While the 128-bit encryption of Microsoft's MPPE is considered strong enough to adhere to corporate security policy, TestKing.com is concerned about security holes in MS-CHAPv2 authentication. Which three of the following would you advise TestKing.com about applying MS-CHAPv2 authentication in a PPTP VPN? (Choose three)

- A. MS-CHAPv2 is subject to offline dictionary attacks.
- B. MS-CHAPv2 is only secure when combined with MAC filters.
- C. MS-CHAPv2 is compliant with WPA-Personal, but not WPA2-Enterprise.
- D. MS-CHAPv2 can be replaced with EAP-TLS as the authentication mechanism for PPTP.
- E. MS-CHAPv2 uses anonymous Diffie-Hellman authentication, and is therefore secure.
- F. MS-CHAPv2 is appropriate for WLAN security when used inside a TLS-encrypted tunnel.

**Answer: A,D,F**
