Which of the following is the most common compression format for documents in a common Content Manager installation, assuming all of the files originate from a front-end image capture systems?

- A. CCITT Group 3 TIFF
- B. CCITT Group 4 TIFF
- C. GIF format
- D. JPEG format

**Answer: B**

**Question 2:**

After a System administrator has re-installed the Content Manager Library Server database, which of the following should be checked to verify if the new installation was successful?

- A. icmserver.log
- B. icmcrldb.log
- C. icmcrmdb.log
- D. database.log

**Answer: B**

**Question 3:**

Which of the following must a Tivoli Storage Manager Management class have in order to work with Content Manager?

- A. I only
- B. II only
- C. III only
- D. I and II only
- E. II and III only

**Answer: B**

**Question 4:**

Which of the following application is NOT mandatory in order to install Content Manager?

- A. C++ Compiler
- B. Tivoli Storage Manager
- C. WebSphere Application Server
- D. A relational database

**Answer: B**

**Question 5:**

## TestKing IBM 000-442 Exam Questions & Answers

---

Management has set a password duration in the Library Server configuration. Which of the following if any, needs to be done to the users' account to implement this policy?

- A. Set the password expiration limit for DB2.
- B. Set the password duration for each user to zero.
- C. Confirm that the password expiration for users accounts is set to use system default time.
- D. Nothing. The system default expiration automatically over rides all user setting.

**Answer: C**

### Question 6:

Which of the following events CANNOT be selected for logging when creating item types?

- A. Create
- B. Delete
- C. Read
- D. Route

**Answer: D**

### Question 7:

At the library level, which of following is NOT a valid option for setting the default access list use by object (entities) in the Library Server Configuration?

- A. Item Type's ACL
- B. Library's ACL
- C. Resource's ACL
- D. User Profile's ACL

**Answer: C**

### Question 8:

- A. APPLAHEAPSIZ
- B. NUM\_IOSERVERS
- C. MAXLOCKS
- D. MAXAPPLS

**Answer: D**

### Question 9:

When the password of the Resource Manager system userid (i.e radmin) is changed, which configuration file will also need to be updated with the new password?

- A. cmbconfig.properties
- B. icmrm.properties
- C. icmsrvrs.ini
- D. icmrm.xml

**Answer: B**

**Question 10:**

Two document type item types, Doc1 and Doc2, have been created with version control. The XYZ document in Doc1 has five versions. A user decides to re-index the XYZ documents from Doc1 to Doc2. Which of the following will happen to the versions on document XYZ?

- A. Deleted
- B. Kept as Doc1
- C. Reindexed to Doc2
- D. Appended to Doc2

**Answer: A**

**Question 11:**

Which of the following is NOT necessary to make an item type text searchable?

- A. Enable the Information Extender service for the Library Server database
- B. Enable the Text Information Extender service for the Resource Manager database
- C. Enable the "Enable Text Information Extender" feature in the Content Manager System Administration Client
- D. Enable the "Text searchable" feature while defining item type

**Answer: B**

**Question 12:**

A document item type consists of a base part, annotation part and notes log part. A content manager administrator needs to segregate parts and store them in separate locations on the storage area network. Which of the following need to be created to accomplish such data management?

- A. A collection per part type
- B. A storage class per part type
- C. A subfolder per part type
- D. A management class per part type

**Answer: A**

**Question 13:**

An administrator has configured a Content Manager system so that the first storage location for new documents is an optical jukebox managed by Tivoli Storage Manager (TSM). However, the administrator notices that it is taking extremely long to import documents into the system. Which of the following statements is a logical reason for this performance problem?

- A. The staging directory is too small to handle the amount of documents being imported.
- B. New documents are being imported at the same time the destager process is running. New documents are placed on the first storage volume, which in this case is a slower optical device.
- C. The cycle time and batch size of the migratory process is not large enough to handle the amount of documents being stored on TSM.

Answer: C

**Question 14:**

There is a need to fine out how many images in the system are of MO: DCA format and how many are of TIF format. Which table can be queried to find out how many image are of each format in a single Resource Manage?

- A. ICMSTMIMETYPES
- B. FACC2MIME
- C. RMOBJECTS
- D. SYSDATATYPES

Answer: C

**Question 15:**

A trucking company will use Content Manager to manage their bill of ladings (receipt issued to a shipper) and delivery verifications. Different areas in the trucking company are involved depending on where the shipped cargo resides or where the cargo is in transit. For the trucking company to have the bill of lading flow to employees in each stage of the process, how should they implement the Content Manager document routing process?

- A. Use multiple worknodes, worklists and associated access control lists for each area of the business in the bill of lading process.
- B. Use multiple wroknodes, decision point and associated access control list for each area of the business in the bill of lading process.
- C. Use multiple collection points, tasklists and associated access control lists for each area of the business in the bill of lading process.
- D. Use multiple workbaskets and associated access control lists for each area of the business in the bill of lading process.

Answer: A
