

**000-647**

**Rational Performance Tester**

**Exam number/code:** 000-647

**Exam name:** Rational Performance Tester

**Questions & Answers:** 58 Q&A

**Related Certifications:** [Solution Designer](#)

**Hundreds of people each day pass their IT certification exams with Testking guaranteed certification resources and training kits.**

Use the [IBM 000-647](#) questions and answers to practice for your next IBM certification exam. If you don't pass – you don't pay! Testking has the first and only 100% product satisfaction and exam passing guarantee. Advanced practice questions and answers help drive the information into your routine thinking and surpass 000-647 brain dumps in retention and skill building.

[IBM](#) 000-647 exam answers and practice questions can be used at home or office, installable on up to two PCs, or print the questions and answers to take with you and train on-the-go! IBM 000-647 preparation tools are the perfect fit for any IBM certification candidate with [000-647](#) training materials for every level of entry.

### **Exam Engine Features**

Control your IT training process by customizing your practice certification questions and answers. The fastest and best way to train.

- \* Truly interactive practice tests
- \* Create and take notes on any question
- \* Retake tests until you're satisfied
- \* YOU select the areas of the exam to cover
- \* Filter questions for a new practice test experience each time
- \* Re-visit difficult questions

**Exam: 000-647 Certification Questions & Answers**

**Question 1:**

You need to report the total server throughput for all traffic during a test run using the default Test Report. Which counter is best to use?

- A. Page Element Report: Page Element Throughput Page Element Attempt Rate
- B. Performance Report: Page Throughput Page Hit Rate
- C. Transaction Report: Transaction Throughput Transaction Rate per Second
- D. Page Element Report: Page Element Throughput Page Element Hit Rate

**Answer: D**

**Question 2:**

It is common to exclude collected test data during ramp up and ramp down of a performance test.

What do you do to discard the last ten (10) minutes of a test for reporting purposes?

- A. Set the graphs X Sliding Scale property to 600
- B. Set the graphs XMinproperty to the total run time minus 600
- C. Set the graphs XMaxproperty to 600
- D. Set the graphs X Max property to the total run time minus 600

**Answer: D**

**Question 3:**

What does the Performance Report: Response vs. Time Detail Graph show?

- A. The average page response time per interval for each individual page vs. run duration
- B. The average response time for all page elements during the run vs. run duration
- C. The measured page response time for each individual page vs. run duration
- D. The maximum page response time per interval for each individual page vs. run duration

**Answer: A**

**Question 4:**

Which is NOT a possible report customization?

- A. Focus on items of interest by filtering data
- B. Insert items by adding new counters to the report
- C. Control the appearance of items by specifying the graph type
- D. Rearrange items by specifying a sort order

**Answer: D**

**Question 5:**

Which view is most useful for identifying the cause of failing page elements?

- A. Page Element Report: Server Health Detail
- B. Test Execution History
- C. Page Element Report: Response vs. Time Detail
- D. Verification Points Report: Summary

**Answer: B**

**Question 6:**

Once a reference has been established, what is used to most efficiently find all subsequent potential substitutions?

- A. The Test Search tool searching all Requests
- B. The "find more" and "go to" functions from the right-click submenu on a candidate
- C. The Test Data preview pane under the test elements
- D. The Search and Replace tool

**Answer: A**

**Question 7:**

A customer recently purchased RPT. The playback tests appear to have passed in the Test Execution History. However, upon closer inspection using the Protocol Data view, some pages following the datapool substitution failed. What is the most likely cause of this problem?

- A. The datapool value was substituted, but not fully correlated.
- B. The datapool variable was substituted with the incorrect test element.
- C. The datapool was not checked with a verification point.
- D. The datapool was opened in the wrong shared mode.

**Answer: A**

**Question 8:**

What can the built-in resource monitoring of RPT be used to monitor?

- A. Linux hosts
- B. All platforms supported by the TPTP monitoring framework
- C. Windows hosts
- D. Mainframe hosts

**Answer: C**

**Question 9:**

What are the main performance schedule elements?

- A. User groups and tests
- B. Selectors and comments
- C. Loops and delays
- D. Number of users and run duration

**Answer: A**

**Question 10:**

Generally, applications that use client side logic require the relevant subsequent responses to be correlated with a \_\_\_\_\_.

- A. Custom code class
- B. Variable from datapool
- C. Field reference
- D. Reference

**Answer: A**

**Question 11:**

What is caused by an overloaded system under tests?

- A. Increased CPU usage on test agents
- B. Response failures or timeouts
- C. Increased RPT license consumption
- D. Too much data logging

**Answer: B**

**Question 12:**

Which is a challenge of test data management?

- A. Developing representative and realistic tests, while minimizing the overhead introduced by the test tool
- B. Using the datapool import wizard when managing large amounts of data
- C. Understanding the relationship of interrelated data needed for datapools and correlation
- D. Managing the datapool data for all the iterations of the virtual testers across all agents

**Answer: A**

**Question 13:**

The level of detail in the Execution History is dependent on \_\_\_\_\_.

- A. Group size setting
- B. Log level
- C. The user think time limit
- D. The number of users

**Answer: B**

**Question 14:**

How can you create a copy of an RPT test?

- A. From the Navigator view, right-click the .recmodel file; select Generate Test; choose Performance Test Generator; enter a new name for the copied test
- B. Select the test; from the File menu, click ? Save As ; enter a new name for the copied test
- C. Switch to the Navigator view; select the source Java file (\*.rec) of the test; from the File menu, click ? Save As; enter a new name for the copied test

D. Right-click the test; select Copy from the menu; enter a new name for the copied test

Answer: A

Question 15:

Performance Test results data can be exported from RPT in XML, HTML and CSV format. Which view contains information that can be exported in CSV format?

- A. Test Execution History
- B. Test Navigator
- C. Performance Report
- D. Performance Test Runs

Answer: D
