Hundreds of people each day pass their IT certification exams with Testking guaranteed certification resources and training kits.

Use the [IBM 000-934](#) questions and answers to practice for your next IBM certification exam. If you don't pass – you don't pay! Testking has the first and only 100% product satisfaction and exam passing guarantee. Advanced practice questions and answers help drive the information into your routine thinking and surpass 000-934 brain dumps in retention and skill building.

[IBM](#) 000-934 exam answers and practice questions can be used at home or office, installable on up to two PCs, or print the questions and answers to take with you and train on-the-go! IBM 000-934 preparation tools are the perfect fit for any IBM certification candidate with [000-934](#) training materials for every level of entry.

Exam Engine Features

Control your IT training process by customizing your practice certification questions and answers. The fastest and best way to train.

- * Truly interactive practice tests
- * Create and take notes on any question
- * Retake tests until you're satisfied
- * YOU select the areas of the exam to cover
- * Filter questions for a new practice test experience each time
- * Re-visit difficult questions

Exam: 000-934 Certification Questions & Answers

Question 1:

A customer has created a new custom True64 UNIX RMI-based agentless adapter profile using a toolkit capability. She is ready to use this profile. If IBM Tivoli Directory Integrator (ITDI) is installed on the same computer as IBM Tivoli Identity Manager (ITIM), what is required for the customer to use this particular profile?

- A. Import the custom .jar file and the Service Definition file using the Import button on Manage Services Types on the administrative console.
- B. Click Create under Manage Service Types, define the new Service Type name, and then browse for the new custom service schema on the LDAP class search facility.
- C. Import the custom .jar file using Import/Export from the administrative console; install the adapter on the target.
- D. Import the custom .jar file using Import/Export from the administrative console; the adapter profile is ready for use.

Answer: A

Question 2:

Which method can be used to test the post office function?

- A. On the Configuration tab for the post office, select Test, enter a valid e-mail address, and send an e-mail with default system data.
- B. Create a temporary user with an e-mail, and assign a task that creates an e-mail notification for that person.
- C. Perform an operation that requires a manual workflow step, and then contact the appropriate person to see if they received the e-mail.
- D. Modify the post office configuration to send all e-mail to a specific account. Then perform an action that causes a notification to be sent to that account.

Answer: C

Question 3:

What is the correct sequence of actions when deploying adapters?

- A. Server configuration, adapter installation, adapter configuration, certification authority setup, and adapter profile installation
- B. Adapter installation, adapter configuration, certificate installation, adapter profile installation, and service definition
- C. Service definition, adapter installation, adapter profile installation, certificate installation, and adapter configuration
- D. Adapter installation, service definition, adapter configuration, adapter profile installation, and certificate configuration

Answer: B

Question 4:

Which two actions cause dynamic roles to be reevaluated? (Choose two.)

- A. When a person entity personal information is modified
- B. When the IBM Tivoli Identity Manager (ITIM) LDAP schema is updated
- C. When an associated provisioning policy is modified (one for which the role defines membership)
- D. When the LDAP filter is modified
- E. When a new user is added to the organization tree

Answer: A,D

Question 5:

When should recertification notification e-mails be sent out?

- A. During hours when users are reading e-mail
- B. During low production load hours
- C. During system maintenance windows
- D. The first week of every month

Answer: B

Question 6:

Which option describes a prerequisite for installing an IBM Tivoli Identity Manager (ITIM) fix pack?

- A. Stop the LDAP server that is used to contain the ITIM data.
- B. Make sure that the WebSphere server that is running the ITIM application is running.
- C. Ensure that the SOAP request timeout value is set to 150 or less by using the `com.ibm.SOAP.requestTimeout` property.
- D. Install the WebSphere Update installer for the appropriate WebSphere version.

Answer: D

Question 7:

Which two LDAP directory servers does IBM Tivoli Identity Manager V5.0 support? (Choose two.)

- A. Sun ONE Directory Server Version 5.2
- B. Novell Directory, Version 8.7
- C. IBM Tivoli Directory Server, Version 6.1
- D. OpenLDAP, Version 2.4
- E. IBM Tivoli Directory Server, Version 6.0

Answer: A,C

Question 8:

What sets of areas can be disabled on the Self Service Console?

- A. Banner area, Toolbar area, and Footer area
- B. Navigation area, Toolbar area, and Content area
- C. Banner area, Content area, and Footer area
- D. Content area, Banner area, and Toolbar area

Answer: A

Question 9:

Which information is stored in a certificate used to secure the connection between IBM Tivoli Identity Manager Server and its adapters?

- A. Certificate expiration date
- B. Certificate encryption strength
- C. Certificate requester name
- D. Certificate encryption type

Answer: A

Question 10:

Which statement is true for the use of V4.6 adapters with IBM Tivoli Identity Manager (ITIM) V5.0?

Answer: D

Question 11:

Under which two conditions would a manual service type be used? (Choose two.)

- A. The service is going to manage only a small set of accounts.
- B. The provisioning workflow requires a manual step to be performed by a person.
- C. Some or all provisioning activity requires a person to perform the action.
- D. The service requires manual approval from multiple people.
- E. There is no adapter available, and it is not possible or practical to develop a custom adapter.

Answer: C,E

Question 12:

Which task is least likely to be affected by client delays?

- A. Assessment
- B. Solution design
- C. Customization
- D. Installation

Answer: B

Question 13:

Which two attributes are required for an IBM Tivoli Identity Manager custom person entity? (Choose two.)

- A. eraliases
- B. sn
- C. cn
- D. uid
- E. mail

Answer: B,C

Question 14:

You work as network administrator for TestKing.com. You study the exhibit carefully.

Exhibit:

Policy	Description
Policy 1	Priority = 1 Attribute: localgroup = groupA, enforcement = DEFAULT
Policy 2	Priority = 2 Attribute: localgroup = groupB, enforcement = MANDATORY

A union-based provisioning policy join directive is in place. According to the information in the table, which two statements are true? (Choose two.)

- A. The account creation will fail if localgroup is any value other than groupB.
- B. During reconciliations, localgroup is defined as groupB if the attribute is undefined or incorrectly defined.
- C. During reconciliations, the current value of localgroup is groupA. The value will be changed to groupB.
- D. During account creation, localgroup is defined as groupA and groupB.
- E. During account creation, localgroup is defined as groupA.

Answer: B,D

Question 15:

Which two options would be included in a customization design? (Choose two.)

- A. Requirements for JavaScript extensions that will be used in workflows
- B. A matrix of requirements for password policies for all UNIX platforms
- C. Requirements for a service provider that will be used to interface with the managed platform using Web Services
- D. JavaScript for the Active Directory service identity policy
- E. Definitions of e-mail content for all approval e-mails

Answer: A,C
