- * Filter questions for a new practice test experience each time
- * Re-visit difficult questions

Exam: 70-630 Certification Questions & Answers

Question 1:

As the SharePoint administrator for your company, you have been assigned the task of creating a hierarchical Internet-facing site primarily to promote the company and present news releases and other information regarding new products and corporate growth. Some of the elements the site must include are a home page, a press releases subsite, and a search center. This site will attract mostly readers rather than contributors. Of the following selections, which default template most closely matches these requirements?

- A. An Enterprise site template Records Center site
- B. A Publishing site template Publishing portal site
- C. A Publishing site template Collaboration portal site
- D. An Enterprise site template Search Center site

Answer: B

Question 2:

You work as a SharePoint Server administrator at TestKing.com. You have used a customized site definition to implement a design standard for TestKing.com. However, after you have used Microsoft Office SharePoint Designer 2007 to make changes to a few Web pages, you notice that the changes do not comply with the design standards.

How can you need to return the pages back to their former condition?

- A. You should consider having a custom Application log view created with the corporate site definition.
- B. You should consider having the Resource Assignment page enabled on the site master page.
- C. You should consider having the CSS style sheet edited in order to have a reference included to the site master page that will contain the corporate site definition.
- D. You should consider having the Reset to site option used on the pages that is not conforming to the corporate site definition.

Answer: D

Question 3:

You work as a SharePoint Server administrator at TestKing.com. The TestKing.com network has a database server named TESTKING-DB30 that is running Microsoft SQL Server 2005. TestKing.com has acquired a Marketing Data Catalog (MDC) application that will access a database hosted on TESTKING-DB30. To ensure productivity throughout the company you need to make sure that the information exposed via the Marketing Data Catalog (MDC) application is available in the search results.

What actions should you take to perform this task?

- A. By having the information displayed in the Resources Earned Value view.
- B. By having Project selected from the View Type list in order to display the resource data.
- C. By having the application.master file edited using an ASCII editor.
- D. By having the default access account implemented for the Marketing Data Catalog (MDC) application.

Answer: D

Question 4:

You work as a SharePoint Server administrator at TestKing.com. TestKing.com contains quite a few document libraries that have the .inf file extension. You have received instructions from the CIO to make sure that content from .inf files are not included in searches that are run against the root site.

What actions should you take to perform this task?

- A. The best option is to disable the data in the Gantt Chart on the Project Center Views.
- B. The best option is to disable the Shared Services Provider Synchronizing job.
- C. The best option is to remove the .inf file extension from the file type inclusion list.
- D. The best option is to run the stsadm command with the enumsites operator.

Answer: C

Question 5:

You work as a SharePoint Server administrator at TestKing.com. TestKing.com has a Development department with a database server named TESTKING-DB02. TESTKING-DB02 hosts a database named KingProducts. TestKing.com has implemented a Web application in the SharePoint site that must access data in KingProducts.

What actions should you take?

- A. The best option is to obtain and install an application definition file from the Development department.
- B. The best option is to enable the Save for Sharing option, then save KingProducts in the Development department.
- C. The best option is to save KingProducts as a Microsoft Excel 2007 worksheet.
- D. The best option is to create a custom group in the Site Settings page to the trusted file locations list.

Answer: A

Question 6:

You work as a SharePoint Server administrator at TestKing.com. TestKing.com is using quite few Microsoft Office InfoPath forms which are used to retrieve data from the Web services. You have received complaints from a few TestKing.com users that they cannot access the Web services from their Web-forms.

What actions should you take to perform this task?

- A. The best option is to select the Work Offline option.
- B. The best option is to select the Resource Center view.
- C. The best option is to select the Web service proxy for the user-created Web-forms.
- D. The best option is to select the Data Analysis view on the data sources.

Answer: C

Question 7:

You work as a SharePoint administrator for TestKing Inc. You have been tasked with changing the administration port. The port change is to stay in compliance with the company's security policy, which requires that all default administrator ports be changed to

887. You log on to the SharePoint server with local administrator privileges. What will you use to change the administration port?

- A. Central Administration
- B. Cmd.exe
- C. Ipconfig
- D. Stsadm command-line tool

Answer: D

Question 8:

You work as a SharePoint Server administrator at TestKing.com. TestKing.com contains a Microsoft SQL Server 2005 database server named TESTKING-DB20 that supports a forms library that is Web-enabled. TestKing.com has a Sales department that comprises of more than 8,000 users.

These users access the forms library on a daily basis. However, you have received numerous complaints with regards to the poor response of the forms library. During the investigation you saw that the session data for the InfoPath forms are less than 35 KB.

How can you configure TESTKING-DB20 for better the response time?

- A. The best option is to configure Central Administrator Diagnostic Logging for the InfoPath Forms Services.
- B. The best option is to enable Diagnostic logging for the InfoPath Forms Services.
- C. The best option is to set the Complete Through constraint for the InfoPath Forms Services.
- D. The best option is to set the Form Session State to Form view.

Answer: D

Question 9:

You work as a SharePoint Server administrator at TestKing.com. TestKing.com has a Sales department that stores documents in a SharePoint site. The site has a list view Web part named TKCustomers that is populated with the names of customers. You have received instructions from the CIO to add another Web part that will allow the Sales department members to filter the names displayed on the TKCustomers Web part.

How would you accomplish this?

- A. By adding a Text Filter Web part.
- B. By adding a DropDown List on the Web part.
- C. By replacing the TKCustomers Web part with a GridView.
- D. By using the view in the team builder.

Answer: A

Question 10:

You are the SharePoint administrator for your company, and you have tasked PJ, a member of your staff, with configuring the nightly differential backup of the SharePoint web applications. As the web applications grow with use, PJ has become concerned that the size of the applications will eventually exceed the storage capacity of the backup location. PJ already knows the fixed capacity of the backup location for the web applications. How can he know the size of any given web application before the backup operation is performed?

TestKing [Microsoft 70-630](#) Exam Questions & Answers

- A. On the Perform a Backup - Step 1 of 2: Select a Component to Backup page, when PJ selects the backup components, an automatic counter displays the size required to back up those components.
- B. On the Perform a Backup - Step 1 of 2: Select a Component to Backup page, each Share-Point component displayed on the page has its estimated size shown in the Size column.
- C. On the Start Backup - Step 2 of 2: Select Backup Options page, the estimated size of the selections you made on the previous page are displayed next to the Type of Backup selection section.
- D. On the Start Backup - Step 2 of 2: Select Backup Options page, the estimated size of the selections you made on the previous page are displayed below the Backup Location field.

Answer: D

Question 11:

You are the SharePoint administrator for your company. You are teaching a class for new site owners in the organization to help them better understand and administer the SharePoint sites for their departments. You are currently explaining the concept of lists in SharePoint 2007. Although the site owners could create customized lists for their sites, a number of default site templates should meet most of their needs. Of the following options, which ones are default list templates?
(Choose all that apply.)

- A. Calendars
- B. Colleagues
- C. Tasks
- D. Project Tasks

Answer: A,C,D

Question 12:

As part of your preparation for developing an installation plan for SharePoint Server 2007, you discover that you will need to install MOSS 2007 on a server running Windows Server 2003 SP1 or better. You plan to use SQL Server 2005 Standard Edition for SharePoint's database needs. Of the following options, which edition of Windows Server 2003 will you not be able to use for the installation?

- A. Windows Server 2003, Standard Edition
- B. Windows Server 2003, Enterprise Edition
- C. Windows Server 2003, Datacenter Edition
- D. Windows Server 2003, Web Edition

Answer: D

Question 13:

You are the SharePoint Server 2007 administrator for the Callisto Software Applications Company. In response to Callisto having recently purchased both Ananke Dynamics, Inc., and Elara Development Corp, you need to create an entirely new shared services provider (SSP) in your server farm to meet the changing requirements for SharePoint. You plan to delete the single existing SSP and create a new one. What are the first steps you must take?

- A. You must create a new SSP first before you can delete your only currently existing SSP in the server farm.
- B. On the Shared Services Admin Site under Manage Shared Services, click the Create and Delete link, and then click the Delete Current SSP button. The SSP will be deleted, and

you'll automatically be taken to the Create a New SSP page.

C. On the Manage this Farm's Shared Services page, click to the right of SharedServices1 (Default), and then click Delete. The default SSP will be deleted, and you'll be taken to the Create a New SSP page.

D. You cannot create a second SSP in a server farm. You must either edit this SSP to meet your needs or create a new server farm with an SSP that meets your needs. Then you must connect the web applications in the original server farm to the SSP in the new server farm.

Answer: A

Question 14:

You work as a SharePoint Server administrator at TestKing.com. A TestKing.com employee named Andy Reid works in the Research and Development department. Andy Reid has stored a file in the document library called Research Docs. One morning Andy Reid made changes and save the file. The CIO wants to see the original file before those changes was made.

How would you prevent this from ever happening again?

- A. The best option is to select versioning on all document libraries.
- B. The best option is to select the Save for Sharing option to retain previous versions of files.
- C. The best option is to set the Complete Through constraint on the document libraries.
- D. The best option is to set the View Options section on the Document Center template.

Answer: A

Question 15:

You work as a SharePoint Server administrator at TestKing.com. You have received instructions from the CIO to implement a new SharePoint site. The CIO wants the site to have a key performance indicator (KPI) list, a data connections library and a reference library.

How would you accomplish this?

- A. The best option is to add a new pivot chart.
- B. The best option is to add a new dashboard page.
- C. The best option is to add a new State field.
- D. The best option is to add a new Project Center page.

Answer: B
